Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Election/Restrictions

1. Applicant's election without traverse of claims 1-11 in Paper No. 6 is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art in view of Aoyama (US 6,282,229).

Admitted prior art (see Figure 4 of the present application) discloses the claimed "signal delay bank" (Fig. 4, 84), "a complex correlator" (88, 92, 82). The admitted prior art differs from the claimed invention in that a plurality of "integrators" (86), rather than "a single sliding window matched filter" as claimed, is used for matching filtering the received signals.

Aoyama discloses a receiving apparatus wherein a single sliding correlator (Fig. 1 and 5, element 7) is used to calculate the multiplication and summation of the SS signal and the PN sequence over a prescribed period of one or more symbol periods. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the admitted prior art's receiver by employing a single sliding correlator or matched filter, as described in Aoyama's system. By using a sliding matched filter as described, the hardware will be desirably reduced in scale.

Art Unit: 2634

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kawabe et al discloses a diversity receiver wherein a single matched filter is used for path searching. Webster et al discloses a RAKE receiver wherein a channel matched filter is used to receive symbols of pluralities of direct spreading chips.
